# Garden Adirondack Chair

The **Adirondack chair** (also called a [Muskoka chair](#) in parts of Canada) is a simple chair made of wood or man made materials, generally used outdoors. Originally made with 11 flat wooden boards, it features a straight back and seat and wide armrests. All will help you sit back and relax, but take a look at some additional features and find the chair that's really calling your name. You just have to listen ...

# Garden Rocking Chair

Rocking chairs are often seen as synonymous with parenting, as the gentle rocking motion can soothe infants.

Many adults find rocking chairs soothing because of the gentle motion. It has been shown that the motion of gentle rocking relaxes the body and allows people to sleep better.

When a user sits in one without rocking, the chair automatically rocks backward until the sitter's center of gravity is met, thus granting an ergonomic benefit with the occupant kept at an un-stressed position and angle.

## DECK CHAIR

A deckchair (or deck chair) is a folding chair, usually with a frame of treated wood or other material. The term now usually denotes a portable folding chair, with a single strip of fabric or vinyl forming the backrest and seat.

It is meant for leisure, originally on the deck of an ocean liner or cruise ship. It is easily transportable and stackable, although some styles are notoriously difficult to fold and unfold. Different versions may have an extended seat, meant to be used as a leg rest, whose height may be adjustable; and may also have arm rests.

---

Displaying all the associated words with the seaside, this deckchair sling and frame works well to portray a calming nature which will bode well with your outside space.

It offers a comfortable space to sit, from the garden patio to the beach, and is perfect for use when the weather permits. Easy to clean, its a wonderful addition to your existing garden furniture.
